

failed trajectory τ

s_1 Agent A

s_2 Agent B

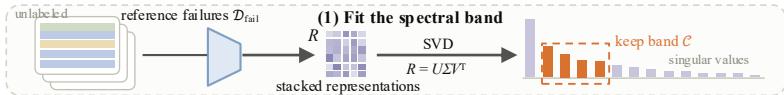

s_3 Agent A

s_4 Agent C

s_5 Agent B

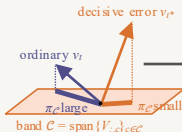

s_6 Agent C

✗ task fails

(2) Spectral base score

Representations of the failed trajectory

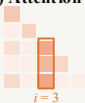

base score $S(s_i)$

$\text{argmax } S \text{ drifts past } t^*$
(downstream contamination)

(3) Attention-guided rescoring

attention weights $w_{i,t}$

there should be something here.

rescored $\tilde{S}(s_i)$

f

$w_{3,t} S(s_i)$
